

# Coa Solutions

Better government services. Meaningful partnerships.

## Who We Are

As an 8(a), **Service-Disabled Veteran-Owned Small Business (SDVOSB)**, we believe that people are the key to success. Our founding team brings expertise from leading high impact projects in the tech industry and government subcontracting, offering a unique blend of strategic insight, human-centered design, and technical prowess.

## How We Work

Coa Solutions prioritizes nurturing environments for all involved to thrive. We know firsthand that the key to transformative solutions is understanding the nuanced needs of government agencies and the people they serve. Our goal is to create impact by bringing together best practices in data and human-centered product development with the strategic, regulatory, and partnership needs of our government clients.

## What Sets Us Apart

Our distinct advantage lies in our founders' diverse experiences in the public and federal sector, this includes their time with the United States Digital Services and The Department of Veterans Affairs, DHS, USCIS, GSA, Vox, and Accenture. Our ongoing commitment to human-centered design and agile methodologies, enables us to deliver solutions that are not just effective but also empathetic and user-friendly.

## Where We Work

Coa Solutions has established itself as a trusted partner to various government agencies delivering innovative approaches to solve critical challenges at:

- **Veterans Affairs (VA):** Strategically partnered with Agile Six on the VA CEDAR contract vehicle, with multiple years of delivery on high impact Software Development projects.
- **Organ Donation:** We have successfully partnered with leading non-profit organizations and government agencies seeking to improve outcome for organ donation recipients.

## Our Services

Coa Solutions excels in delivering transformative expertise across the product and project delivering across the following domains:

### Software Engineering:

Our teams utilize open-source technologies and agile development. This approach results in secure, scalable, and extensible services and applications.

### Human-Centered Design (HCD)

We transform digital experiences by prioritizing user engagement and design thinking to solve problems grounded in human needs, inclusivity, and accessibility.

### DevSecOps:

We specialize in building secure infrastructures that automate and standardize the testing and deployment of services by government agencies.

### Product & Project Management

Our expertise extends to the strategic planning, development, launch, and governance of products that meet user needs, stakeholder expectations, and compliance requirements.
